SUMMARY

As a dedicated Full Stack Web Developer in the healthcare sector, I bring a wealth of experience in creating dynamic websites using WordPress and PHP. My focus is on crafting exceptional user experiences, particularly through mobile-first design and innovative problem-solving. I have a strong background in managing and enhancing web platforms, ensuring they are not only functional but also user-friendly. My expertise extends to integrating various APIs, which plays a crucial role in improving website functionality and user interaction. My passion lies in utilizing these skills to develop and refine web solutions that meet the unique needs of the healthcare industry.
